WHY CHOOSE SEAN DOYLE WINDOWS?

Since 1979, **Sean Doyle Windows** has been dedicated to delivering quality, reliability, and skilled craftsmanship to your home.

At Sean Doyle Windows, Ireland's trusted name in windows and doors, we're more than just a supplier—we're a family business, now three generations strong, committed to bringing the very best to Irish homes. Every product we offer is designed, handcrafted, manufactured, and expertly installed by our team in Roscommon, meeting the highest Irish standards for quality and durability.

OUR WINDOWS & DOORS

We offer a wide range of windows and doors—aluminium, PVC, aluclad, and hardwood—tailored to suit the diverse needs of homeowners throughout Ireland. All of our products are carefully crafted in our Roscommon-based factory and are available for viewing in our Dublin showroom in Tallaght.

WHY CHOOSE US?

As a family-run business, we pride ourselves on our reputation for excellence, our years of experience, and our unwavering commitment to meet your needs with the care and expertise only family can offer. Whether you're choosing a single window or updating an entire home, you can trust Sean Doyle Windows Ltd to deliver quality, integrity, and unmatched service.

Sean Doyle Windows - Crafted with Care Since 1979

Completed project in Co. Meath

10 REASONS TO CHOOSE ALUMINIUM FOR YOUR HOME

1. **Slim profile with larger glass surface.**
Aluminium's strength allows for slimmer frames, meaning you can enjoy larger panes of glass that maximize natural light and provide expansive outdoor views.

2. **Resistant to corrosion & weather.**
Aluminium is naturally resistant to rust and corrosion, making it ideal for a long-lasting window solution. Aluminium frames withstand extreme weather conditions without warping, cracking, or expanding, which makes them suitable for diverse climates.

3. **Energy efficient to reduce heat loss.**
Our aluminium windows feature thermal breaks, which are insulating barriers that reduce heat transfer, making them highly energy efficient. Combined with quality glazing, aluminium windows can significantly enhance your home's insulation, keeping it warmer in winter and cooler in summer.

4. **Innovative locking system**
Our windows feature innovative, advanced multi-point locking systems for enhanced security

5. **Tough & secure glazing.**
Aluminium windows use toughened glazing for enhanced security, making them highly impact-resistant and difficult to penetrate.

6. **Comes in a large range of RAL colours.**
Aluminium windows are powder-coated in various colours and finishes (600+ options), enabling a customised look that fits your home's aesthetic.

7. **All our windows meet PAS 24 standards.**
PAS 24 is a security testing standard designed to assess the ability of windows and doors to withstand attacks from opportunistic burglars.

8. **The highest NSAI certifications and energy ratings.**
Our windows are NSAI certified, ensuring they meet rigorous standards for quality and compliance, providing you with trusted security and performance.

9. **Value for Investment with minimal upkeep costs.**
Aluminium windows offer long-lasting durability, low maintenance, and energy efficiency, leading to cost savings over time. Aluminium requires no regular treatments, repairs, or repainting, keeping maintenance expenses minimal.

10. **Environmentally friendly - recyclable material.**
Aluminium is highly recyclable, and its durability and longevity mean it rarely needs replacement.

Sean Doyle Windows Ltd are constantly adapting and looking to the future so if you want to embrace contemporary design with durability, meeting modern building regulations and also making a minimal environmental impact then Aluminium is the future.

We have made multi-million-euro investments in new state of the art Aluminium machinery and cutting-edge technology. Our Aluminium window products include the Vision, Enhanced and Affinity ranges which means there is always something to suit every taste and budget available in a range of colours in both double and triple glazing.

ICON LIFT & SLIDE PATIO DOORS

ICON Lift & Slide Patio Doors are perfect for huge glazing spaces with each panel up to 3m wide. ICON Patio Doors are designed, tested and manufactured to the highest standards.

The inherent load bearing capacity of aluminium allows patio doors to be made with a higher percentage of glass area than other materials, allowing more natural light into your home.

The ICON Triple Rail Patio Door has all the features of a Dual Rail with the added benefit of a third track, allowing a 66% opening aperture, by comparison with 50% on the Dual Rail.

It's a brilliant alternative to a bifolding door for large openings in houses, luxury apartments and commercial buildings.

With a simple turn of the handle, the door can be locked in an open position - perfect for ventilation or when children are playing nearby.

Completed project in Co. Roscommon

PATIO DOORS

ICON Lift & Slide Patio door system exhibits the excellent thermal insulation (Uw from 0.9 Wm^2K#).

With a modern aesthetic of straight lines, it has profiles tailored for residential and commercial projects and both for new build and renovation.

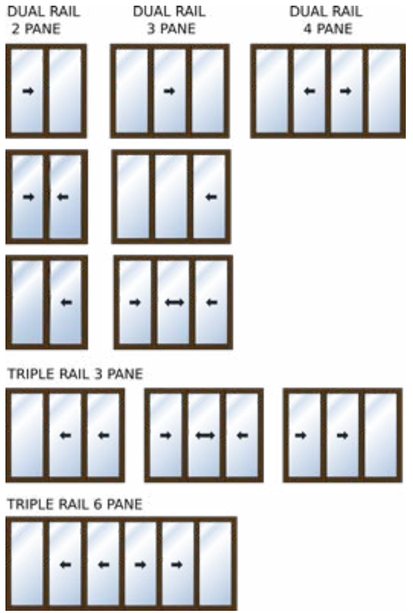

The possibility of large sash dimensions makes this system ideal for enclosing large spaces, at the same time that it provides maximum luminosity.

The system combines a robust appearance with a lightweight design, offering an ultra-smooth opening action and flawless sash sliding along a stainless steel rail.

> "I would 100% have no hesitation in recommending Sean Doyle Windows. From start to finish this was the easiest company to deal with. Efficient and knowledgeable staff... high standard products and even higher standard of workmanship."
>
> Gillian Brown

ICON Lift & Slide Patio Doors are available in a range of opening options to suit your space and requirements. With dual rail and triple rail solutions they can be configured to suit all architectural specifications.

WINDOWS - VISION

Vision Aluminium Windows semi-flush construction elegantly complements contemporary architectural design. The **Vision** Window is sustainable, energy efficient and comes fully certified to the BM Trada Q mark scheme.

The System is designed to deliver exceptional performance and energy efficiency for your home. This eco-friendly, fully certified system prioritises sustainability, featuring aluminium profiles with at least 50% recycled content. With a profile depth of 66mm, it supports both internal and external glazing, accommodating units from 28mm to 48mm. The system also offers a range of sash styles, providing flexibility to suit any design.

A stunning, modern design is achieved easily with slim aluminium being available in up to colours.

The **Vision** Range comes fully certified to the CEN solution Gold quality standard.

Completed project in Co. Wicklow

FEATURES OF THE VISION RANGE

SECURE
Secure 2-3 point locking system. Tested to PAS 24 Standards.

ENVIRONMENTALLY FRIENDLY
The Vision Range is sustainable and energy efficient and comes certified to the BM Trada Q Mark Scheme.

WEATHER RESISTANT
Vision offers outstanding performance in water tightness, double-sealed air permeability, and wind resistance.

COLOUR
Over 20 anodized colour options available.

GUARANTEE
All Sean Doyle windows are backed by a 10 year guarantee.

STYLE
Semi Flush construction. Option to open out, top or side hung.

ENHANCED RANGE

Enhanced Aluminium Windows have been developed to satisfy the thermal requirements that the modern building industry demands, with a durability and design that will look good and last for years.

This window range combines all the latest technology in window design which combines polyurethane resin with a multi chamber isolator core to ensure all requirements of building regulations and project specifications are exceeded

The system is 66mm in depth and can be glazed both internally and externally with Double Glazed 28mm units through to 48mm Triple Glazed units.

Fixed (or picture) windows are ideal for showcasing scenic views, creating a seamless connection between your indoor space and the outdoors. With their minimal hardware and large glass panels, they flood rooms with natural light while serving as a design focal point, perfect for living rooms or areas with picturesque surroundings.

Completed project in Co. Meath

WINDOWS - ENHANCED

FEATURES OF THE ENHANCED RANGE

"As an architect working in business for over 20 years, I count on quality and customer service when it comes to window selection. Sean Doyle Windows never failed to deliver. There is always someone to help, to choose best product to suit my design. From classic style I use in period houses to slim frame, modern huge triple sliders in modern bespoke design."

PATRYCJA ROGALA - ARCHITECT

GLASS TO GLASS WINDOWS

At Sean Doyle Windows, we specialise in frameless aluminium glass-to-glass corner windows that offer exceptional architectural flexibility. These sleek, seamless windows create a stunning focal point, transforming any space with their ability to flood rooms with natural light and provide expansive views of the outdoors. Crafted with precision, they combine the durability of aluminium with large glass panes, enhancing the open, airy feel of any room.

Ideal for both new builds and renovations, these windows are a popular choice for modern glazing projects. The contemporary design of glass-to-glass corner windows elevates the aesthetic of any home, particularly when paired with complementary window or door systems. Their ability to let in more light throughout the day makes them perfect for open-plan living areas.

Available in a variety of configurations, from full-height designs with fixed or sliding doors to those with window seats, our versatile options suit any style, adding a striking 'wow-factor' to your home.

ROOF LIGHTS

Let the sunshine flood your home with our bespoke roof lights—an ideal solution for brightening kitchens, sunrooms, or artist studios.

Our roof lights are designed to maximize natural light, transforming any space into a vibrant, inviting environment.

This **Contemporary Range** features sleek aluminium frames with minimal external moulding, offering clean, modern lines that can be customized in any RAL color.

These roof lights are available in both double and triple glazing to suit your specific insulation needs.

For more classic aesthetics, our **Classic Range** is crafted to complement traditional architecture, with aluminium frames inside and out for lasting durability in any weather. Like our contemporary models, these can be finished in any RAL color to seamlessly match your existing color scheme.

Discover how our custom roof lights can elevate your space, bringing in abundant light while enhancing your home's character.

Roof windows provide natural light and ventilation, enhancing energy efficiency thus creating a brighter, more comfortable living space. They also offer a unique view of the sky, adding aesthetic and architectural value to your home.

LANTERN ROOF LIGHTS

When replacing an existing roof or building an extension, consider a roof lantern to flood your space with natural light. A roof lantern can transform an old, tired flat roof into a striking architectural feature. Adding a roof lantern can create a beautifully lit, warm space that the whole family will enjoy year-round.

Our aluminium roof lanterns suit both contemporary and traditional designs, providing a timeless aesthetic and exceptional energy efficiency. Unlike older glass roof options, our roof lanterns are built for thermal performance, with options for up to 50mm triple glazing and thermally broken frames. With U-values as low as 0.7 W/m²K, these roof lanterns offer the perfect alternative to a conservatory roof, creating a bright, comfortable space that can be enjoyed in every season.

If you are looking to create a large open plan kitchen/ living space, one of the challenges you will face is getting enough light into the property to fill the space. Roof lanterns are a great solution to this problem as they enable you to bring in vast amounts of light through the ceiling of the property.

A fixed lantern roof light brings abundant natural light into the kitchen, making the space feel brighter and more inviting. Its sleek design adds a modern architectural feature, enhancing the overall aesthetic without requiring ventilation.

CHOOSE THE RIGHT COLOUR FOR YOUR HOME

The possibilities for color are virtually endless. Select from an expansive range of shades, allowing you to customise your doors and windows exactly as you envision.

Today, modern building trends are driven by architectural innovations and styling, leaning towards more contemporary design, with the muted and solid tones of greys and blacks featuring in the most inspirational design works of the day.

Anthracite Grey in a matt finish and Jet Black in a matt finish, along with Hippca Gloss White are currently the most in-demand colours from architects and building specifiers. As a result, profiles in these three individual colours are held in stock in large quantities. This permits customers to order from their actual site survey, for a fast delivery and not have order from drawings/plans, risking a correct fit at the first install, as builders work to tolerances, not exact sizes, in most instances.

All door and window profiles are available in any single colour taken from either the RAL or B.S. chart, offering a solution every time. Your thermally broken aluminium profiles are powder coated. This is a process whereby

the original, milled metal profile is prepped ready to take a coating of electrically charged powder. The profile is then heat treated at an extremely high temperature, bonding the powder to the metal. The finished surface is very durable and easy to maintain. The finish is also graded for its level of gloss with matt finished being the most popular on darker colours.

Powder coating is environmentally friendly as there is no excess of paint, as all residual powder is recycled within the process and has the ability to last decades without having to be painted. Your doors and windows will be coated using an Akzo Nobel powder product called Interpron. Akzo Nobel are a world leader in the coatings industry.

All door and window profiles are available in any single colour taken from either the RAL or B.S. chart, offering a solution every time.
